

GOA POLICE HACKATHON 2024

AI-BASED TOOL TO ASSIST VISITORS AT POLICE STATIONS

Introduction

- **Language Barriers:** Difficulty in communication due to lack of multilingual support for non-native speakers.
- **Complex Legal Procedures:** Lack of understanding of legal processes, leading to confusion and delays in filing reports.
- **Frequent Queries:** Overwhelming police personnel with repetitive questions about common legal concerns.
- **Limited Access to Information:** Difficulty accessing basic legal information without prior knowledge or in-person visits.
- **Manual Assistance:** Dependence on police staff for guidance, causing delays and inefficiencies.
- **Documentation Confusion:** Unclear requirements for filing complaints and obtaining legal documents.

Proposed Solution

- **Objective:** To develop an advanced NLP-driven voice activated chatbot that streamlines access to legal information.
- **Multilingual Accessibility:** Facilitates seamless interaction across diverse languages.
- **Case Filing & Documentation:** Streamlines the process of case initiation and automates document generation.
- **Navigating Legal Procedures:** Provides comprehensive guidance through intricate legal frameworks, including the steps involved in police case registration.
- **Addressing Common Inquiries:** Expedites the resolution of frequently encountered legal queries.
- **Cost-Efficiency:** Significantly reduces the necessity for physical consultations, conserving both time and resources.

It allows users to begin the process of applying for a Police Clearance Certificate (PCC) by guiding them through the necessary steps and documentation required for the application.

It enables visitors to check the current status of their PCC application by entering their application details, providing real-time updates on the progress of their request.

It allows administrators to securely log in to the system and update the live status of PCC applications for users.

It is a chatbot allowing users to speak their issue in their preferred language. It identifies the type of case and guides them through the legal procedures to follow.

It is a chatbot enabling users to ask general legal queries and receive informative responses to their questions.

SERVICES

The "Services" Button on the homepage provides visitors with easy access to a list of various crimes for which they can file a case. By clicking this button, users can quickly identify the specific category of their issue, streamlining the reporting process. This feature not only simplifies the task for visitors, allowing them to efficiently navigate their options, but it also enhances the workflow for police officers by organizing case filings. Ultimately, this functionality fosters a more effective communication channel between the public and law enforcement, ensuring that both parties can manage cases more efficiently.

Results & Comparison with Existing Solutions

- **Lack of Online Translators:** No existing online translators are available at police stations, causing communication barriers for out-of-state visitors.
- **In-Person Queries:** Visitors previously needed to visit police stations to inquire about case types and procedures, leading to inconvenience.
- **Fully Online System:** Our solution enables all processes, including case inquiries and submissions, to be completed online, enhancing accessibility.
- **Online Case Filing:** Introduced the ability to file various types of cases online, addressing a significant gap in existing solutions.
- **Remote PCC Status Checks:** Eliminates the need for physical visits to check the status of Police Clearance Certificate applications, allowing users to access this information from anywhere.
- **Centralized Legal Information:** Previously, individuals had to research basic legal information, such as police station locations and emergency contacts; now, all this information is centralized in our chatbot for easy access.

Conclusion

- **Enhanced Interaction:** Developed a user-friendly online platform to improve communication between visitors and police services.
- **Innovative Tools:** Introduced CopBot and CopHelp, utilizing NLP technology for instant access to legal information and guidance.
- **Streamlined Processes:** Transformed traditional in-person procedures into an online format, reducing the need for physical visits.
- **Addressing Communication Barriers:** Facilitated better interactions for out-of-state visitors by providing online translation and legal assistance.
- **Efficient Case Filing:** Implemented a "Services" button for easy identification and filing of various crime cases.
- **Real-Time Updates:** Enabled users to track the status of their Police Clearance Certificate applications remotely.
- **Empowerment of Citizens:** Equipped users with essential information during critical situations, enhancing public safety.
- **Improved Officer Productivity:** Simplified workflows for police officers, allowing them to focus on more complex cases and improving overall efficiency.
